Model EZ2-FH

Pat. # 6,343,532

EZ2FH Spin Tool has just received the highest rating (over42SLR) from the Innovation Institute, Everton, MO This company evaluates products for many of the leading retailers, having evaluated over 30,000 plus new product ideas and inventions. The evaluator in our case was Gerald G. Udell, Ph.D. In part some of his comments: "Overall, your evaluation report is one of the most positive evaluation reports that we have produced this year. This is in part due to the advanced state of your development, but in larger part it is because of superior design.. Recently we completed a study of the literature on new product failure. One of the major failure factors appears to be the lack of significant competitive advantage. That issue is clearly not in evidenced here." Copy of full report available on request

<u>FEATURES</u>	<u>BENEFITS</u>
Cross bar, swept back design	Leverage placed on both handles, simultaneously, applies maximum torque to lug nut, thus breaking over tightened lug nuts is made possible
Main shaft "freely" spins within the sleeve holding handle	Minimum spin resistance for fast and easy tire changing. Provides total tool control. No hand skin chaffing.
Swept back design	Increases reach into deep offset designed wheels. Sets cross bar handles in a more advantageous position.
Attached knurled folding cross bar handles	Positive grip, no slipping. Cross bar handles fold into main shaft for convenient storage in your trunk or tool box.
Heavy duty rectangular hub	Improves and maintains spin momentum
Package includes chrome plated tool plus two 1/2 dr. flip sockets 17/19mm 21/23mm Tool and packing designed to ensure years of service	Socket sizes for most USA & foreign passenger vehicles

Specification:  
Model EZ-2FH  
Overall Length: 15"  
Usable reach: 9"  
Handles: 8"  
Weight: 4#  
Main Shaft Dia: 5/8"-1/2" Dr.  
Includes: 17x19mm-21x23mm flip sockets  
Equivalent: 11/16"-3/4"-13/16"-7/8"
